EDUCATION

Bachelor of Technology in Computer Science and Engineering	2023–27
KL Deemed to be University, Vijayawada	CGPA: 9.24
Intermediate	2021–23
Sri Srinivasa Gravity Junior College, Vijayawada	Percentage: 89.4%
Secondary School	2020–21
Slate the School, Vijayawada	CGPA: 99.16

PERSONAL PROJECTS

Website Uptime & Latency Monitoring System | Google Cloud Platform (GCP)

- Architected a GCP-based monitoring system tracking uptime and latency across 10+ endpoints, achieving 99.9% tracking accuracy and reducing false-positive alerts by 40%.
- Configured automated health-check pipelines via Google Cloud Monitoring, cutting mean time-to-detect (MTTD) outages by 60% and saving ~10 hours/month in manual troubleshooting.
- Leveraged Cloud Compute Engine and Cloud Functions for event-driven fault detection, processing 500+ health checks per hour with zero manual intervention.

Serverless Contact Form & Enquiry Management System | AWS Lambda, API Gateway, DynamoDB, SES

- Slashed backend response time by 67% (from 3s to under 1s) by optimizing AWS Lambda execution plans and enabling API Gateway caching for high-traffic scenarios.
- Orchestrated automated email alerts via AWS SES and provisioned a DynamoDB schema supporting 1,000+ concurrent form submissions with zero server maintenance overhead.

Employee Training & Onboarding Management System | MongoDB, Express.js, React.js, Node.js (MERN)

- Spearheaded a MERN stack onboarding platform supporting Admin, Manager, and Employee role hierarchies with end-to-end course assignment and progress-tracking workflows.
- Implemented JWT-based authentication with role-based access control (RBAC) and built 15+ reusable React.js components with Redux, reducing UI build time by an estimated 25%.
- Designed 10+ RESTful API endpoints with Express.js and MongoDB (Mongoose ODM), achieving sub-200ms query latency for all CRUD operations.

EXPERIENCE

Virtual Internship in Cloud Computing | EduSkills (AWS Academy)

Jul 2024 – Sep 2024

- Pursued 200+ hours of structured AWS training covering EC2, S3, IAM, and CloudWatch; independently provisioned and configured cloud environments meeting security and availability benchmarks.
- Established comprehensive system monitoring with CloudWatch alarms and auto-scaling, ensuring high availability and reducing security vulnerabilities by 25% in lab settings.

Full Stack Web Development Intern | SDRB Technologies

Jun 2023 – Jul 2023

- Engineered 5+ responsive full-stack web modules using React.js and Node.js/Express.js, cutting page load time by ~30% through component optimization and RESTful API integration.
- Led Git/GitHub version control workflows and introduced Agile sprint practices, improving feature delivery predictability and long-term code maintainability across the team.

TECHNICAL SKILLS AND INTERESTS

Languages: C, Python, JavaScript, HTML, CSS

Backend & Cloud: Node.js, Express.js, AWS (EC2, S3, Lambda, API Gateway, DynamoDB, IAM, SES), GCP (Compute Engine, Cloud Functions, Cloud Monitoring)

Databases: MongoDB (Mongoose ODM), MySQL, DynamoDB, NoSQL

Tools & Practices: Git, GitHub, VS Code, Postman, Agile,

CERTIFICATIONS

- AWS Certified Developer – Associate
- MongoDB Associate Developer
- MongoDB Associate Database Administrator
- Automation Anywhere Certified Essentials RPA Professional
- Linguaskill English Certification (B2) | Cambridge Assessment
- Multi-Cloud Network Associate | Aviatrix
